

HILLARY NTHOME

IT OFFICER | IT SUPPORT | SYSTEMS & NETWORK SUPPORT

Nairobi, Kenya | 0797 259 596 | hillarynthome97@gmail.com

PROFESSIONAL SUMMARY

Results-driven IT Officer and Technical Support professional with 4+ years of hands-on experience supporting users, devices, systems, networks, and day-to-day technology operations across government, NGO, education, and operational environments. Skilled in troubleshooting Windows devices, Microsoft Office/365, hardware, software, printers, internet connectivity, and basic network issues.

Experienced in maintaining reliable ICT infrastructure, resolving user incidents, supporting system deployments, managing IT equipment, and training users. Brings a proactive, hands-on approach to minimizing downtime and ensuring that staff have the technology support needed to operate efficiently.

Available to join immediately and ready to support fast-paced hospitality and restaurant operations, including POS systems, staff devices, printers, CCTV infrastructure, and network connectivity.

PROFESSIONAL EXPERIENCE

Technical Support Intern | Kenya Revenue Authority (Jan 2025–Dec 2025)

- Supported hardware, software, email, printer, and connectivity issues.
- Administered Microsoft 365 accounts and access permissions.
- Supported software deployment and patch management across 200+ devices.
- Maintained ICT assets and supported network troubleshooting.

ICT Consultant / IT Support | Freelance | February 2025 – Present

- Deliver first-line IT support for hardware, software, connectivity, and user-related issues, applying structured troubleshooting to restore normal operations quickly.

- Configure and maintain Windows computers, applications, user devices, printers, and digital work environments to support reliable day-to-day operations.
- Diagnose internet, Wi-Fi, and basic network connectivity issues, reducing disruption and improving user productivity.
- Maintain technical documentation and digital records to support efficient issue tracking and faster resolution of recurring problems.
- Provide practical user guidance on software, devices, and digital tools, enabling clients to resolve common issues independently.

Systems & Applications Developer Intern | ICT Authority | November 2022 – December 2023

- Provided technical and systems support within a government ICT environment, contributing to reliable access to digital services and applications.
- Participated in the team that designed and developed the Government E-Waste Management System, contributing to requirements gathering, system development, testing, and user support.
- Supported the Digital Literacy Programme, helping train users on digital tools and improving confidence in the use of technology.
- Diagnosed and resolved hardware, software, and user-related issues, minimizing interruptions during programme delivery.
- Supported application testing, documentation, and troubleshooting to improve system usability and reliability.

E-Waste Trainer & ICT Support | WEEE Centre | 2024

- Delivered practical training on ICT equipment, responsible device handling, refurbishment, and e-waste management.
- Diagnosed hardware faults and supported the refurbishment of computers and ICT devices, extending the usability of available equipment.
- Supported the setup and maintenance of ICT equipment used during training activities.
- Trained participants on proper handling and maintenance of technology equipment, strengthening technical awareness and reducing avoidable equipment damage.

IT Support Technician / ICT Facilitator | Petanns Institute

- Delivered hands-on technical support for computers, software, and institutional ICT equipment, helping maintain reliable learning and administrative operations.
- Diagnosed and resolved common hardware and software faults, reducing equipment downtime and improving availability for staff and students.
- Maintained computer lab equipment and supported system installations, configurations, and routine maintenance.
- Trained students and users on Microsoft Office, computer applications, and digital tools, improving practical ICT competency.
- Worked closely with users to identify technical issues and provide clear, practical solutions.

IT Support | Kenya Red Cross Society

- Delivered frontline technical support to staff, resolving hardware, software, and connectivity issues across multiple departments.
- Supported installation, configuration, and maintenance of computers and ICT equipment, helping ensure staff had reliable tools for daily operations.
- Troubleshoot network and connectivity issues and escalated complex incidents appropriately to minimize operational disruption.
- Assisted with IT asset tracking, equipment management, and technical documentation to improve accountability and support planning.
- Provided user support and guidance, improving staff confidence in using organizational systems and digital tools.

Data Capture Officer | Kenya National Examinations Council (KNEC) | 2023–2024

- Processed and verified high volumes of sensitive examination data while maintaining a strong focus on accuracy, confidentiality, and deadlines.
- Used computer systems and digital records to validate information and identify discrepancies before final submission.
- Worked effectively in a high-pressure, deadline-driven environment where system availability and accurate processing were critical to operations.
